Re: Fielding Chemical Technologies Inc.
3575 Mavis Road, Mississauga, Ont.
Total Quality Management System

March 17, 2015

To Whom It May Concern:

Fielding Chemical Technologies Inc. (Fielding) has had an active Total Quality Management System (TQMS) for the last 20 years having passed numerous external ISO audits. In fact, Fielding was the first solvent/refrigerant recycler in the World to achieve both ISO 9000 and ISO 14000 certification.

Fielding will continue to verify the effectiveness of its TQMS in 2015 through its Internal Audit process. I look forward to overseeing Fielding's self declaration of its conformance to ISO9001:2008 and 14001:2004 during 2015.

Fielding awaits the International release of ISO 9001:2015 and ISO14001:2015, currently expected in late 2015, in order to determine which standard(s) to which it will certify in the future.
